

GT LITHIUM DRINK HOLDER FITTING INSTRUCTIONS

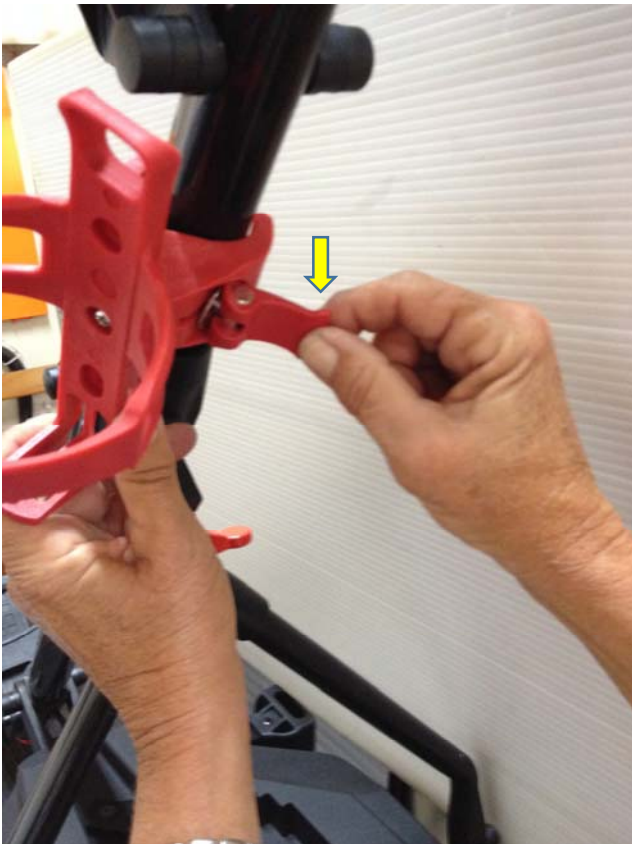

Step One – Loosen off adjusting screw to allow mounting jaws to open as per picture above

Step Two – Push up on upper bag support to allow fitment of drink holder as per picture above

Step Three – Place drink holder on upper section of frame and make sure the Red drink holder touches the Black frame hinge at point indicated by arrow in picture above

Step Four – Now tighten adjusting screw until there is just a little pressure of the drink holder jaws on the main frame. Be careful not to overtighten at this stage, as you will need to push the locking mechanism over in the next step as per Step Five below. Please Note -This may take a couple of tries until you find the correct tightness of the lever

Step Five – Push the locking lever to lock the drink holder in place as per picture above

Step Six – Now try folding the buggy down with the drink holder attached – Make sure the buggy support bar does not hit the drink holder when folding down the buggy frame as indicated by the arrows in picture above.

Please note – You will be able to rotate the drink holder without loosening the lock nut until you find the optimum position to allow the buggy to fold without hitting the drink holder
