

GT Lithium GPS Holder Fitting Instructions

Step 1 - Fit the threaded GPS Mounting screw provided into the opposite side of the Umbrella Mount, as per figure 1 below.

Figure 1

Step 2 – Turn the GPS Mounting screw clockwise and tighten securely as per Figure 2 below.

Figure 2

Step 3 – Place the GPS Holder onto the Mounting screw and turn the Tensioning Lever clockwise until the GPS Holder is secured in the desired position to the Mounting screw as per Figure3 below.

Please Note – Do not overtighten the tensioning lever, as you will not be able to complete step 4 successfully.

Figure 3

Step 4 – Once the tensioning lever has been tightened just enough to secure the GPS holder in place, push down and in on the Tensioning lever until as per figure 4 below until the lever is in the fully locked (down) position.

Please Note - You may need to perform steps 3 & 4 a few times until you achieve the desired secure position of the GPS Holder.
